

JOIN THE WINNING TEAM!

TES Electronic Solutions is a leading international design services company and technology/IP provider. We offer a complete end-to-end service in application-specific electronic product & sub-system design - including supply chain management. We are developing and manufacturing innovative electronic solutions for international customers in all industry segments.

Our comprehensive product development expertise covers a wide range of embedded electronics design disciplines:

- System-architecture and system-design of electronic products
- Radiofrequency, microwave, wireless and antenna design
- PCB based hardware development
- Embedded software design
- HMI and graphics and multimedia systems
- Digital ASICs and FPGAs
- Analog-, Mixed-Signal And RF ASICs

In order to sustain the continuous growth of the company, we are looking for:

Analog-Mixed Signal/RF ASIC Design Engineers (m/f)

for our locations in Berlin, Düsseldorf, Munich and Stuttgart

We are also looking for mobile engineers, to work embedded in our customers' organisations and/or in a home office.

Your challenge:

- You are involved in all phases of typical life cycle of custom specific integrated circuits (ASICs) for various industrial applications such as Automotive and Industrial Systems, Communications, Avionics and Space
- You specify, model, implement, verify and test custom specific electronic integrated circuits
- You will be part of highly efficient, dynamic international teams and work for major international customers
- You will apply state-of-the-art development tools and methods of electronic circuit development

Your profile:

- You have a degree in electrical engineering or similar technical disciplines
- You are a team worker and have excellent communication skills
- You take over responsibility and you are flexible
- You have good English and German language skills
- You have an excellent technical background in electronic systems and in design of integrated circuits
- Ideally you have already several years of experience in design of analog and/or digital integrated circuits
- Experience in international environment and in interfacing with customers as well as in project management would be nice

We offer great career opportunities, an attractive salary, flexible working time as well as an excellent working environment. Are you interested? Please send your application to:
